Features

- Visible Light Facial Recognition
- Anti-spoofing algorithm against print attack (laser, color and B/W photos), videos attack and 3D mask attack
- Multiple verification methods: Face / Fingerprint / Card / Password
- Optional card modules: 125KHz ID Card (EM) / 13.56MHz IC Card
- Supplement lighting with adjustable brightness

Visible Light Facial Recognition Embedded

Recognition distance 2m long and extra wide angle recognition

The recognition distance has been greatly extended to 2meters long, which significantly improves maximum traffic rate. While most of the algorithms only support +/-15° of detectable face angle, MB560-VL doubles the detection angle in terms of head rotation and tilt to +/- 30°.
